Dear Mr. Hermansson,

RE: HAMMAR H20, HYDROSTATIC RELEASE FOR LIFE RAFTS

Thank you for your letter of 10th April 1990 together with U.K. Department of Transport Marine Directorate. Certificate of Inspection and Tests dated 23rd October 1985. We also appreciate receiving your well illustrated brochure of your product.

This Administration is linked with the British Registry of Shipping, and we have a good working relationship with the Surveyor General's organisation, and so we already approve the Hammer H20 Hydrostatic release for liferafts and EPIRBS.

Our surveyors are familiar with the Hammer H20 release in the course of their ship inspections and accept its use, provided it is within the two year validation period. For your information this release is fitted on the Bermuda Marine and Ports Services tugs "Faithful" and "Powerful".

Yours sincerely,

G. L. Munday
Senior Nautical Surveyor
pp R. D. Ross
Principal Marine Surveyor
