THE SCHEDULE OF APPROVAL

1. PRODUCT DESCRIPTION :

Hammar Remote Release System (MRRS) and (MRRSX) are designed to release heavy loads with little effort. By means of a vacuum pump, which is operated manually, the vacuum is conveyed via stainless steel tubing to a release unit. A membrane is activated, releasing a sharp knife of stainless steel which cuts the rope sling holding the object to be released.

The **MRRS** and **MRRSX** are to be used for remote release of inflatable liferafts.

The **MRRS** and **MRRSX** can be associated with an H2O Hydrostatic Release System without interfering with the Hydrostatic Release system when installed onboard as per the manufacturer's recommendation.

The **MRRS** and **MRRSX** cannot be installed instead of a Hydrostatic Release System when a HRU is required.

The **MRRS** and **MRRSX** does not need to be periodically serviced (it is of disposable sealed unit type).

TYPE	Operational lifetime of a total of
MRRS	24 months installed onboard
MRRSX	30 months installed onboard
